

Creating the Student Organic Farm at the University of Minnesota

by Courtney Rosenthal Tchida

Completed in Partial Fulfillment of the
Requirements of the Masters of Education Degree

Division of Agricultural Education
Department of Work and Human Resource Education
College of Education and Human Development
University of Minnesota

September 2007

Acknowledgements:

I would like to thank Jared Ashling and David Campbell for their desire to “create a place on campus for students to try growing things organically”.

I would like to thank Don Rosenthal for all his love and support through this process.

I would like to thank Bud Markhart and Paul Porter for their confidence in me to fearlessly lead our class of students through this process and into the future.

I would like to thank Helene Murray and the rest of the Minnesota Institute for Sustainable Agriculture’s staff and board members for their support in this project.

I would like to thank Dr. Richard Joerger for serving as my advisor for my Masters Degree and this project.

I would like to thank Dr. Roland Peterson and Dr. Larry Klingbeil for serving on my review committee.

Acknowledgements:	2
1. Introduction to the Integrating Paper	8
Where will the next generation of farmers come from and how will they farm?	8
Background	9
Problem Statement	9
Rationale Statement	10
Purpose of the Project	10
Objectives	10
Limitations and Assumptions that Guided the Project	11
2. Literature Review	12
Theories of Learning	12
Meeting our objectives	13
3. Rooted in Student Involvement The beginnings of the Student Organic Farm	15
Where did the student farm idea come from?	15
4. Student Farm Planning	19
How does a student farm planning class begin?	19
The Syllabus	20
Each Week's Game Plan ~ Lesson Plans	25
Week 1 Lesson Plan	26
Week 2 Lesson Plan	27
Building a Sustainable Business Plan Tasks	28
Textbook as a Template	28
Decision Making	29
Creating a Master Plan	29
Examples of Discussion Threads Online	29
Utilizing Technology	29
Classroom Layout	30
5. Building a Community	31
Making a group of strangers a community	31
Examples of Introduction Sheets	32
Task 1: Identify Values- What's Important to You?	32
Building a Community Time Table	33
Participants in the Spring 2005	34
6. Consensus Building	35
Consensus Building	35
Resources for Consensus Building:	35
Consensus Building Time Table	36
Two Tasks to take on early	36
Consensus Building Handout	37
Small Group Consensus Building Handout	39
Large Group Consensus Building Handout	40
Amendments to the Large Group Consensus Building Model	42
Techniques in Practice	42
Two Tasks, Two Fates	43
Presentation Notes:	44
7. Assessing Land Resources	45
Task 2: What have you got?	45

Brainstorming Lists	46
Identifying Groups	46
Assessing the Land Time Table	46
Current Situation & Farm History Groups	46
Results	46
Current Situation & Farm History Assignment	47
8. Strategic Planning	53
Vision, Mission & Goals- Where do you want to go?	53
Class Activity: What are your priorities for the Student Farm?	54
Strategic Planning Time Table	54
Over arching Ideas	54
Guiding Principle Areas	54
Strategic Planning Terms, Definitions & Process	55
Goals and Objectives Worksheet	56
Results of Strategic Planning	57
The Importance of Strategic Planning	57
9. Potential Partnership and Neighbors	58
Who's Who?	58
Asset Based Community Development	59
Potential Partnerships & Neighbors Time Table	59
Categories of Local Assets	59
Potential Partners and Neighbors Assignment	60
Mapping Reciprocal Relationships	61
Results of Investigating Potential Partnerships and Neighbors	62
10. Markets and Growing Methods	63
Mid semester check-in	63
Considerations for Markets	64
Cropping Systems to Consider	64
Results	64
Markets and Growing Methods Time Table	64
System Components Considered	64
Power Point Presentation	65
Market Options	69
Whole Farm Coop Model	70
System Components Questions	71
Cropping System Questions	71
Results	71
11. Crops: Selection & Cultivation	72
What will we plant continued	72
Top Ten To Grow Lists	73
Plants Selection and Cultivation Time Table	73
Results	73
Investigating Perennials Assignment	74
Results	75
Investigating Perennials Peer Review Assignment	76
Crop Profile Assignment	77
Results	77
12. Farm Layout	78
Creating a Farm Layout	78
Initial Idea for Farm Layout	79
Bubble Diagram Exercise	79

Farm Layout Time Table	79
Farm Layout Survey Results	80
Examples of Student's Bubble Diagrams	80
2005 Farm Layout Plan as of May / End of Class	81
2005 Block Layout	82
Block Layouts	83
Keyhole Block	83
Companion Planting Block	84
Eliot Coleman Style Rotation Block Plan with Cover Crops	85
Jeavons Temporal Polyculture Block	86
Actual 2005 Layout	87
13. Putting the Plan into Action	88
Making It Happen	88
Top Eight List of Important Facts From Certification Meeting	90
Organic Certification Time Table	90
Record Keeping To Do List / Presentation Notes	91
2005 Sample of Seed Log	92
2006 Sample of Seed Log	92
2006 Sample of Planting Log	92
Organizational Structure & Internship Time Table	93
Internship Funding Sources	93
Questions for Organizational Structure Discussion	94
Job Announcement for Student Farm Interns	96
Job Application for Student Farm Interns	98
